SUMMARY

DevOps & GenAI Engineer with experience progressing from secure Linux administration to enterprise AWS cloud architecture and backend Java development. Currently driving engineering velocity through Zero-Trust CI/CD pipelines, scalable MLOps, and LLM-driven Agentic AI orchestration.

WORK EXPERIENCE

DevOps & GenAI Engineer

Ascendion

12/2025 – 07/26 | Bengaluru, Karnataka

- Orchestrated agent-driven **SDLC workflows** on Ascendion's **GenAI** core platform (AAVA) by integrating **LLMs**, custom **Knowledge Bases (KB)**, **Guardrails** and **Retrieval-Augmented Generation (RAG)** pipelines, boosting engineering productivity by up to 55%.
- Architected centralized **Terraform (HCL)** workflows to unify distributed **AWS** configurations (**SNS**, **SQS**, **IAM**, **Secrets Manager**), eliminating configuration drift and resolving complex dependency fragmentation.
- Spearheaded infrastructure-level debugging to resolve critical **CI/CD pipeline** outages, systematically remediating **Docker** dependency failures to ensure deployment stability.
- Advanced enterprise **SecOps** by enforcing **Zero Trust** architecture, **Principle of Least Privilege (PoLP)** controls, and **Role-Based Access Control (RBAC)**, proactively mitigating cross-environment security risks during infrastructure validation.
- Refactored backend **JAVA** services to consolidate redundant data identifiers into a single canonical source, eliminating dead code and architectural ambiguity.

DevOps Engineer

Eficens Systems LLC

12/2021 – 08/2024 | Somerset, New Jersey

- Engineered reusable **Terraform** modules to provision and scale core **AWS infrastructure** (**EC2**, **VPC**, **RDS**, **S3**), slashing deployment time by over 50% and establishing baseline consistency.
- Integrated **Terraform IaC** changes into **Jenkins CI/CD pipelines**, optimizing **cloud management** and reducing deployment errors by up to 15 incidents per month.
- Automated critical operational tasks, including **RDS database** upgrades and **SSL certificate** renewals via **Jenkins**, eliminating manual overhead and achieving near-zero downtime.
- Partnered with cross-functional **SecOps** teams to design and enforce fine-grained **IAM policies** and the **Principle of Least Privilege (PoLP)**, ensuring strict regulatory compliance for a Fintech client.

SKILLS

Programming & Scripting:
HCL | Python3 | Bash | SQL

AI & Tools:
AI Agents(AAVA GenAI Core) | Prompt Engineering | Human-in-the-Loop (HITL) | Retrieval-Augmented Generation (RAG) | AI Orchestration | Large Language Models (LLMs)

Cloud Tools (AWS):
EC2 | Route 53 | S3 | Load Balancing | EBS | RDS | DynamoDB | CloudFormation | IAM | KMS | SNS | SQS | VPC | Security Groups

DevOps & Automation:
Terraform | Jenkins | AzureDevOps | Git | Docker | JIRA

OS & Virtualization:
Linux | Windows | VMware

Networking & Monitoring:
TCP/IP | DHCP | Splunk | DataDog | CloudWatch

EDUCATION

M.S. Computer Science

New Jersey Institute Of Technology

Dec 2020

B.Tech Computer Science

Guru Gobind Singh Indraprastha University

May 2017

Jr. System/Cloud Admin

LotusData LLP

03/2021 – 12/2021 Princeton, New Jersey

- Administered and scaled a fleet of 200+ **AWS instances**, ensuring high availability and fault tolerance while sustaining 99% system uptime through proactive **CloudWatch** monitoring and incident resolution.
- Orchestrated robust data integrity and backup protocols utilizing **AWS Snapshots** and **AMIs**, collaborating directly with **DBAs** to guarantee database performance and system consistency.
- Automated **RedHat Linux** deployments via **Kickstart** and dynamically managed filesystem expansion utilizing **Logical Volume Manager (LVM)**, strictly adhering to enterprise security hardening policies.

ADVANCED TRAINING

Certificate in AI Engineering and MLOps

Indian Institute of Technology Bombay (IIT-B)

In Progress

- Architecting scalable machine learning systems leveraging **High-Performance Computing (HPC)** frameworks, utilizing **Message Passing Interface (MPI)** and data parallelism to optimize distributed training across multi-node clusters.
- Developing foundational expertise in managing large-scale, containerized ML workloads, with coursework emphasizing automated CI/CD pipelines, experiment tracking, and **hybrid cloud-HPC integrations**.

CERTIFICATES & BADGES

AWS Machine Learning Engineer

Associate

12/2024

AWS Cloud Solutions Architect

Associate

08/2022

AWS Cloud Practitioner

Foundational

02/2021

EXTRACURRICULARS

- **Vice President of Education:** Toastmasters International, District 83 (University Heights)
- **Vice President:** The Pragmatic Indian Society
- **Award Recipient:** Multiple awards at State and National level in Quiz & Debate
